

HEADLINE NEWS - A Watertight Project !

Uncle Trevor says : "Well Done Team!!"

ET-X Projects is proud to announce our recent achievement on our Two Rivers Thickener Build project, executed for FLSmidth South Africa.

During this project, the team had successfully constructed a 10m, 15m as well as a 50m diameter thickener for FLSmidth. The 15m thickener consumed around 1000m of welding during its construction, and was successfully leak tested on Friday 16th February 2024 without any leaks identified, first time.

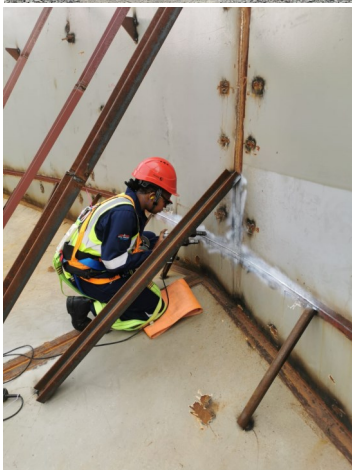

The project was executed without any injuries and in a total of 20 065 Man-hours.

Left : Some pictures of the leak tested Thickener as well as the ET-X projects Laydown and site crew.

The teams dedication and commitment to the project and quality has set them apart.

Their ability to work with the client and other contractors has earned ET-X Projects a good name and reputation on site.
