

## HEADLINE NEWS - A Refurbishment of Note !

*Uncle Trevor says : "Well Done Team!!"*

ET-X Projects is proud to share its current progress and achievement with regards to its Matla Power Station Unit 1 Electro Static Precipitator (ESP) Refurbishment project under Lesedi Nuclear.

Since its start, the team has maintained a high level of momentum and passion towards the project, with clear efforts from artisan level right through to supervision, quality, safety and site management. With a crew compliment of close to 360 people, working around the clock on a three-shift system, and a zero harm target, the team has laid the foundation for great success in achieving its planned completion target of June 2024.

*Top Left: Foreman Lindiwe Msibi, has been recognized for their exceptional performance and dedication.*

*Top Right & Middle Right: The Safety Drive, spanning three sessions to align with the three shifts. Safety awareness and engagement are crucial for maintaining a secure work environment for all. "We All go home, everyday!"*

*Middle Left: Nokuthula Peters was promoted to Foreman position after showing great dedication, commitment and work ethics during the past months.*

*Bottom: The Performance Incentive Drive— a drive to recognise crew performance over the past period, elevating workforce morale and fostering a competitive spirit of work excellence and target achievement between the various teams across the work area.*
